SECRETARIA DE DEFESA AGROPECUÁRIA

AGÊNCIA NACIONAL DE VIGILÂNCIA SANITÁRIA

INSTITUTO BRASILEIRO DO MEIO AMBIENTE E DOS RECURSOS NATURAIS RENOVÁVEIS

INSTRUÇÃO NORMATIVA CONJUNTA Nº 1, DE 18 DE ABRIL DE 2013

Instrução Normativa Conjunta Mapa, Anvisa e Ibama sobre alteração de formulação de agrotóxicos e afins.

O SECRETÁRIO DE DEFESA AGROPECUÁRIA DO MINISTÉRIO DA AGRICULTURA, PECUÁRIA E ABASTECIMENTO, o DIRETOR PRESIDENTE DA AGÊNCIA NACIONAL DE VIGILÂNCIA SANITÁRIA - ANVISA e o PRESIDENTE DO INSTITUTO BRASILEIRO DO MEIO AMBIENTE E DOS RECURSOS NATURAIS RENOVÁVEIS - IBAMA no uso das suas atribuições legais, tendo em vista o disposto na Lei nº 7.802, de 11 de julho de 1989, e no Decreto nº 4.074, de 4 de janeiro de 2002, e o que consta do Processo nº 02001.006006/2010-96, resolvem:

Art. 1º. Estabelecer critérios e procedimentos para a alteração de formulação de agrotóxicos e afins registrados.

Art 2º: Para efeito desta Instrução Normativa, entende-se por:

I - alteração de formulação: qualquer alteração de componentes caracterizados como aditivos e ingredientes inertes ou outros ingredientes na composição da formulação de agrotóxicos e afins registrados.

II - adição de componente: inclusão de componente, não presente na formulação registrada, podendo ocorrer com ou sem substituição de componentes.

III - substituição de componente: adição de componente à formulação, com retirada total ou parcial de outro(s) componente( s).

IV- incremento de componente: acréscimo na quantidade de um componente já presente na formulação.

Art. 3º. Os pedidos de alteração de formulação tratados nesta Instrução Normativa devem ser submetidos à avaliação dos órgãos federais responsáveis pelos setores de agricultura, saúde e meio ambiente, e seguirão o previsto no [Art. 22 do Decreto nº 4.074/02](#).

Parágrafo único: Alterações de formulação somente serão avaliadas se os ingredientes inertes e aditivos requeridos estiverem inscritos no Sistema de Informação de Componentes - SIC.

Art. 4º. A lista dos componentes, caracterizados como ingredientes inertes e aditivos, constará do Anexo VI desta Instrução Normativa, e será divulgada nos sítios eletrônicos dos órgãos federais responsáveis pelos setores de agricultura, saúde e meio ambiente, com as seguintes classificações:

Classe I - componente de máxima preocupação toxicológica e/ou ambiental;

Classe II - componente de média preocupação toxicológica e/ou ambiental;

Classe III - componente de preocupação toxicológica e/ou ambiental não determinada;

Classe IV - componente de mínima preocupação toxicológica e/ou ambiental.

Parágrafo único: Sempre que necessário, a lista de componentes constante do Anexo VI será atualizada,

precedida de parecer favorável do CTA e mediante ato da instituição coordenadora do Comitê.

Art. 5º. A classificação descrita no Art. 4º será feita pelos órgãos de saúde e de meio ambiente com base em informações referenciadas ou estudos quanto aos aspectos de toxicidade em animais, potencial genotóxico, carcinogênico e teratogênico, distúrbios hormonais, toxicidade para organismos aquáticos, bioacumulação, persistência e mobilidade no meio ambiente, levando em consideração o conhecimento científico existente sobre o componente.

§ 1º Na elaboração da classificação, a avaliação do componente, sob o aspecto da preocupação toxicológica, será realizada pelo órgão de saúde, enquanto que, sob o aspecto da preocupação ambiental, será feita pelo órgão de meio ambiente.

§ 2º O enquadramento na classe ocorrerá pelo critério mais restritivo, toxicológico ou ambiental.

Art. 6º. São vedadas as alterações de formulação de agrotóxicos e afins quando:

I - alterar a forma de apresentação (tipo de formulação);

II - implicar em alteração da classificação toxicológica ou do potencial de periculosidade ambiental do produto formulado registrado para classes mais restritivas;

III - alterar a concentração nominal, mínima e máxima do(s) ingrediente(s) ativo(s);

IV - a substituição for por componente de maior preocupação toxicológica;

V - todos os componentes da formulação, exceto o ingrediente ativo, forem substituídos, mesmo que tal alteração se caracterize em mais de um pleito; ou, VI - O componente requerido para fins de substituição for mais tóxico para organismos não-alvo e os dados e informações disponíveis indicarem potencial de persistência e/ou bioconcentração, conforme critérios do Anexo IV.

Art. 7º. Quando a alteração da formulação do agrotóxico implicar na inclusão de componentes com a função de espalhante adesivos e/ou adjuvantes devem ser executados estudos de resíduos com a nova formulação, de acordo com a [RDC nº 04 de 18 de janeiro de 2012](#) e suas atualizações.

Art. 8º. Nos casos em que a alteração implique em incremento de componente com a função de espalhante adesivo e/ou adjuvante devem ser executados estudos de resíduos, de acordo com a [RDC nº 04 de 18 de janeiro de 2012](#) e suas atualizações, salvo quando houver justificativa técnica fundamentada que será avaliada pelos órgãos responsáveis.

Art. 9º. Todos os pedidos de alteração de formulação devem ser acompanhados dos estudos físico-químicos aplicáveis ao tipo de formulação:

I - aspecto e cor;

II - pH;

III - densidade;

IV - tensão superficial;

V - viscosidade; e

VI - distribuição de partículas por tamanho.

Parágrafo único. Deve ser apresentado quadro comparativo das propriedades físico-químicas entre a formulação registrada e a requerida de acordo com o ANEXO V.

Art. 10. Não serão requeridos estudos toxicológicos e ecotoxicológicos para os pleitos de alteração de formulação que se enquadrem nas seguintes situações:

I - adição, incremento ou exclusão de ácido e/ou base para ajuste de pH até a faixa de especificação da formulação;

II - adição sem substituição ou incremento de componente, desde que os componentes alterados sejam de Classe IV.

III - adição com substituição de componente quando:

a) o componente adicionado for de Classe IV;

b) alterado da Classe I para I, Classe I para II e Classe II para II, até o limite de suas respectivas quantidades.

IV - exclusão de componentes.

Art. 11. Para os casos que não se enquadram nas dispensas previstas no Art. 10, deverão ser apresentados os seguintes estudos toxicológicos realizados com a formulação requerida:

I - toxicidade oral aguda

II - irritação ocular

III - sensibilização dérmica Parágrafo único. Quando não existir estudo ou informação de mutagenicidade para o componente a ser adicionado, deve ser apresentado estudo de Ames para a formulação requerida.

Art. 12. Será exigido estudo de toxicidade inalatória aguda com a formulação requerida, para as alterações de formulação que não se enquadram nas dispensas previstas no Art. 10 e nos seguintes casos:

I - quando o produto formulado registrado não possuir este estudo;

II - quando a toxicidade inalatória do componente a ser substituído for mais restritiva do que a do componente presente no produto registrado; e

III - quando não existir informação de toxicidade inalatória do componente registrado e do componente a ser substituído na formulação.

Art. 13. Quando o produto já registrado for extremamente tóxico, ou seja, classe I para a toxicidade aguda oral, toxicidade inalatória aguda, irritação ocular ou sensibilizante, o respectivo estudo será dispensado com a formulação requerida.

Parágrafo único. Para a alteração de classificação toxicológica do produto formulado, os estudos toxicológicos do produto formulado requerido deverão ser apresentados.

Art. 14. Para os casos que não se enquadram nas dispensas previstas no Art. 10, deverão ser apresentados os seguintes estudos ecotoxicológicos realizados com a formulação requerida:

I - toxicidade para micro-organismos do solo - ciclo do carbono e nitrogênio;

II - toxicidade aguda para organismos aquáticos - peixes e microcrustáceos; e

III - toxicidade aguda para abelhas.

Parágrafo único: Alternativamente, para os casos de substituição de componentes, o requerente poderá solicitar a dispensa de realização dos referidos estudos, conforme anexo IV.

Art. 15. Para efeito de reclassificação do produto formulado, em decorrência de alteração de formulação, quanto ao potencial de periculosidade ambiental e alteração de frases de advertência em rótulo e bula, é necessário, no mínimo, a apresentação dos estudos ecotoxicológicos previstos no Art. 14.

Art. 16. O requerimento de alteração de formulação de agrotóxicos e afins deverá ser apresentado em três vias ao órgão registrante, sendo cada uma delas identificada para o órgão a que se destina e conter os seguintes documentos e informações, obedecendo a sequência de apresentação:

I - requerimento assinado, conforme modelo do Anexo I;

II - declaração de razões e objetivos que fundamentam o pedido de alteração de formulação;

III - declaração da composição quali-quantitativa requerida, em conformidade com o modelo do Anexo II;

IV - tabela contendo a comparação entre a formulação registrada e a formulação requerida, com destaque para as alterações, conforme modelo do Anexo III;

V - para os casos que se enquadrarem no Parágrafo único do Art. 14, apresentar tabela contendo informações físico-químicas, ecotoxicológicas e toxicológicas disponíveis para cada componente alterado na composição do produto, conforme modelo do Anexo IV, acompanhada da análise dessas informações;

VI - tabela contendo a comparação dos dados físico-químicos entre a fórmula registrada e a fórmula requerida, conforme modelo do Anexo V;

VII - número da petição eletrônica no SIC para os componentes adicionados ou substituídos, com o uso pretendido na formulação requerida;

VIII - estudos físico-químicos previstos no Art. 9º.

§ 1º Sem prejuízo do disposto no caput deste artigo, deverá ser apresentado exclusivamente ao MAPA, parecer técnico da empresa, empresa, assinado por responsável técnico, com informações sobre a eficácia agrônoma e fitotoxicidade do agrotóxico e afins; atestando a manutenção ou melhoria da eficiência agrônoma do produto.

§ 2º Sem prejuízo do disposto no caput deste artigo e para casos que não se enquadrarem nas dispensas previstas no Art. 10 e no Parágrafo único do Art. 14, deverá ser apresentado exclusivamente ao IBAMA, estudos toxicológicos e ecotoxicológicos previstos nos incisos I e II do Art. 11, no Art. 12 e no Art.14.

§ 3º Sem prejuízo do disposto no caput deste artigo, o conjunto de documentos e informações abaixo deverá ser apresentado exclusivamente à ANVISA:

I - via original do comprovante de pagamento da taxa de fiscalização de vigilância sanitária (GRU), recolhida para o código de assunto "alteração de formulação";

II - cópia do Certificado de Registro do Produto Técnico e do Produto Formulado;

III - cópia do último Informe de Avaliação Toxicológica do Produto Técnico e do Produto Formulado;

IV - cópia da última Avaliação do Potencial de Periculosidade Ambiental do Produto Técnico e do Produto Formulado; e

V - estudos toxicológicos previstos no Art. 11 e 12, quando aplicáveis.

Art. 17. Nos casos em que a análise do pleito indicar alterações significativas nos perfis físico-químico, toxicológico e ecotoxicológico, ou ainda que as fundamentações apresentadas não forem acatadas, estudos e informações adicionais serão requeridos, inclusive nos casos previstos no Art. 10.

Art. 18. A implementação da alteração da formulação deverá ser feita em prazo de até 180 dias após a publicação em Diário Oficial da União da aprovação, pelo órgão federal registrante.

Parágrafo único: Os estoques de agrotóxicos e afins remanescentes nos canais distribuidores, salvo disposição em contrário dos órgãos federais responsáveis pelos setores da agricultura, saúde e meio ambiente, poderão ser comercializados até o vencimento de seu prazo de validade.

Art. 19. Os casos omissos serão decididos pelos órgãos federais responsáveis pelos setores de agricultura, saúde e meio ambiente.

Art. 20. Esta instrução normativa conjunta entra em vigor na data de sua publicação.

[ANEXOS](#)

D.O.U., 22/04/2013 - Seção 1

## Modelo de requerimento

O requerente a seguir identificado requer ao Ministério da Agricultura, Pecuária e Abastecimento, da Saúde (Agência Nacional de Vigilância Sanitária) e do Meio Ambiente (Instituto Brasileiro do Meio Ambiente e dos Recursos Naturais Renováveis), com base no Decreto nº 4.074, de 4 de janeiro de 2002, a avaliação do produto abaixo especificado, para fins de alteração de formulação, para o que presta as informações a seguir e junta os documentos pertinentes:

## 1. Requerente

1.1 nome			1.2 endereço eletrônico		
1.3 endereço			1.4 bairro		
1.5 cidade			1.6 uf	1.7 cep	
1.8 ddd	1.9 fone	1.10 fax	1.11 celular	1.12 cnpj/cpf	

## 2. Representante legal (anexar documento comprobatório)

2.1 nome			2.2 endereço eletrônico		
2.3 endereço			2.4 bairro		
2.5 cidade			2.6 uf	2.7 cep	
2.8 ddd	2.9 fone	2.10 fax	2.11 celular	2.12 cnpj/cpf	

## 3. Produto

3.1 marca comercial	3.2 Número do registro:
3.3 forma de apresentação (tipo de formulação)	

## 4. Tipo de alteração de formulação:

- ( ) Adição com substituição de componentes  
 ( ) Adição sem substituição de componentes  
 ( ) incremento de componentes  
 ( ) exclusão

Dispensa de estudos prevista no Art. 10: ( ) Sim ( ) Não

Apresentam-se anexos:

1. Declaração de razões e objetivos que fundamentam o pedido de alteração de formulação;

2. Declaração da composição quali-quantitativa requerida, em conformidade com o modelo do Anexo II;

3. Tabela contendo a comparação entre a formulação registrada e a formulação requerida, com destaque para as alterações, conforme modelo do Anexo III;
4. Quando aplicável, tabela contendo informações físico-químicas, ecotoxicológicas e toxicológicas disponíveis para cada componente alterado na composição do produto, conforme modelo do Anexo IV, acompanhada da análise dessas informações.
5. Tabela contendo a comparação dos dados físico-químicos entre a fórmula registrada e a fórmula requerida, conforme modelo do Anexo V;
6. Número da petição eletrônica no SIC para os componentes adicionados ou substituídos, com o uso pretendido na formulação proposta;
7. Estudos físico-químicos previstos no Art. 9º.
8. Para o MAPA - Parecer técnico da empresa, assinados por responsável técnico, com informações sobre a eficácia agrônômica e fitotoxicidade do agrotóxico e afins; atestando a manutenção ou melhoria da eficiência agrônômica do produto.
9. Para o IBAMA - Estudos toxicológicos e ecotoxicológicos previstos nos incisos I e II do Art. 11, no Art. 12 e no Art.14, para casos que não se enquadrarem nas dispensas previstas no Art. 10 e no Parágrafo único do Art. 14 .
10. Para a ANVISA
  - a) via original do comprovante de pagamento da taxa de fiscalização de vigilância sanitária (GRU), recolhida para o código de assunto "alteração de formulação"
  - b) cópia do Certificado de Registro do Produto Técnico e do Produto Formulado;
  - c) cópia do último Informe de Avaliação Toxicológica do Produto Técnico e do Produto Formulado;
  - d) cópia da última Avaliação do Potencial de Periculosidade Ambiental do Produto Técnico e do Produto Formulado
  - e) estudos toxicológicos previstos no Art. 11 e 12, quando aplicáveis.
11. Outros - especificar, conforme o tipo de alteração requerida.

**Critérios e Orientações**

1. Nome comum ou nome químico dos componentes da formulação, incluindo o ingrediente ativo, aditivos e ingredientes inertes. Não serão aceitos nomes comerciais de componentes na declaração de composição da formulação.
2. Nº CAS - *Chemical Abstracts Service Number*. Trata-se de um número de registro único, ou seja, um número específico para cada substância ou mistura de substâncias descrito num banco de dados da *Chemical American Society*.
3. Nº SIC - Número específico do Sistema de Informações de Componentes para identificar componentes .
4. Função específica de cada substância incluída na composição da formulação, como por exemplo: ingrediente ativo, solvente, diluente, estabilizante de pH, corante, hemético, espessante, conservante, emulsificante, etc.
5. As misturas de componentes deverão ser apresentadas conforme exemplo na tabela com especificação e as concentrações das substâncias nela contidas.
6. A declaração dos limites mínimos e máximos para todos os componentes da declaração (exceto o teor de ingrediente ativo) devem obedecer ao critério abaixo estabelecido:

Concentração Nominal declarada para cada componente (N) em massa (% m/m)*:	Limites na declaração (% m/m)	
	Mínimo	Máximo
N ≤ 1.0%	N - 10% N	N + 10% N
1.0% < N ≤ 20.0%	N - 5% N	N + 5% N
20.0% < N ≤ 100.0%	N - 3% N	N + 3% N

\*A definição dos limites mínimo e máximo por critério diferente deverá ser acompanhado de fundamentação técnica para que seja avaliado pelos órgãos federais de registro. Não serão aceitas declarações com a expressão "quantidade suficiente para" (q.s.p).

**ANEXO III**

Modelo para apresentação da tabela comparativa da composição qualitativa e quantitativa do agrotóxico e afim - **registrada e a requerida**

**Legenda e orientações**

Observações: para o preenchimento das colunas dessa tabela, seguir a mesma orientação apresentada no Anexo II.

(1) deverá conter a lista de todos os componentes relacionados nas duas formulações - registrada e requerida, com as respectivas informações.

(2) Classificação toxicológica e ambiental de acordo com as lista dos componentes divulgadas nos sítios eletrônicos dos órgãos federais responsáveis pelos setores de agricultura, saúde e meio ambiente.

ANEXO IV

Modelo para apresentação da tabela com informações sobre componentes

Para fins da avaliação do requerimento de alteração de formulação do produto registrado o requerente deverá apresentar a tabela abaixo com informações físico-químicas, ecotoxicológicas e toxicológicas disponíveis sobre cada um dos componentes alterados, acompanhada de sua análise. A fonte das informações deverá ser citada no rodapé da tabela.

Tabela com informações sobre componentes  
(repetir a coluna com os dados dos demais componentes, se houverem)

	Componente (registrado)	Componente (proposto)
Nº CAS		
Nº SIC		
Função		
Propriedades Físico-químicas

Critérios:

1. É dispensada a realização de estudos ecotoxicológicos com a formulação proposta, para cada organismo não-alvo, de acordo com o Art. 14, desde que o componente requerido apresente igual ou menor toxicidade que o respectivo componente substituído;
2. É necessária a realização de estudos ecotoxicológicos com a formulação proposta, de acordo com o Art. 14, quando os dados e informações do componente requerido não estiverem disponíveis para cada organismo não-alvo.
3. No caso do componente requerido apresentar maior toxicidade para organismos não-alvo, o pleito será indeferido sempre que dados e informações disponíveis indiquem potencial de persistência e/ou bioconcentração.
4. Potencial de bioconcentração:
  - FBC <sup>3</sup> 5000
  - Na ausência do FBC, log Kow <sup>3</sup> 4
5. Potencial de persistência: será considerado com características de persistência o componente para o qual os dados e informações disponíveis indiquem em um dos seguintes compartimentos:

	Ar	Sedimento	Água	Solo
Meia-vida (em dias)	> 2	> 365	> 182	> 182
