

## -Sample-

### List of the selected key publications of Bert Myer

1. **Myer B., Xantor, Z., Betton, L. (2011): Water stress in guard cells. Accepted in: Plant survey. (publisher's letter of acceptance attached)**

*[Please explain your selection of key publications here (relevance of results, significance for your academic profile; maximum of 1000 characters). In cases of multiple authorship please also indicate your own personal contribution to this key publication.]*

2. **Finnman, A., Myer, B. (2010): Short sentences in Thomas Mann. New York. TCY Press. 239 pp.**

*[Please explain your selection of key publications here (relevance of results, significance for your academic profile; maximum of 1000 characters). In cases of multiple authorship please also indicate your own personal contribution to this key publication.]*

3. **Myer, B., Mierscheid, J. M., Buelow, V.: Stone louse in pleistocene. Submitted to: Medical Geology. (publisher's acknowledgement of receipt attached)**

*[Please explain your selection of key publications here (relevance of results, significance for your academic profile; maximum of 1000 characters). In cases of multiple authorship please also indicate your own personal contribution to this key publication.]*

#### **OBSERVATIONS:**

1 Post-doctoral researchers can indicate between 1 and 3 key publications. Experienced researchers can indicate between 3 and 5 key publications.

**2 Please upload the text of each key publication as one PDF file.**

**Key publications without the text file are removed from the list without further announcement.**

**3 Please add a detailed English summary (1-2 pages) or a translation for every key publication which is not written in English. The summary should reproduce the ideas of the publication so that an expert reviewer who does not read the original text is able to understand and evaluate the content, methods, and the quality of the publication.**

**The English summary has to be included in the PDF text file of the key publication as first page(s) of it.**

If you do not hand in the English summaries for key publications that are not written in English, a proper evaluation of your key publications will not be possible.

**Therefore non-English key publications without detailed English summaries will be removed from your key publication list without further announcement.**
