

Brazil Climate and Ecological Transformation Investment Platform

Executive presentation

OCTOBER
2024

MINISTÉRIO DA
FAZENDA

MINISTÉRIO DO
DESENVOLVIMENTO,
INDÚSTRIA, COMÉRCIO
E SERVIÇOS

MINISTÉRIO DO
MEIO AMBIENTE E
MUDANÇA DO CLIMA

MINISTÉRIO DE
MINAS E ENERGIA

Brazil has set an ambitious goal of achieving net zero emissions by 2050; reaching this target will require collaboration across multiple sectors

> The **Paris Climate Agreement** established Nationally Determined Contributions (NDC) to combat climate change

> Based on the **G20** country platform **Reference Framework** for voluntary country-level mechanisms, set out by governments and designed to foster collaboration among development partners, based on a shared strategic vision and priorities

~2.00

0.85 – 1.05

Emissions history
(GTCO_{2e}, per year)

Net zero
reduction of emissions aiming to achieve net zero emissions by 2050

2050

The Brazilian government is already making progress toward achieving net zero through its various government transition plans

MINISTÉRIO DA FAZENDA

MINISTÉRIO DO MEIO AMBIENTE E MUDANÇA DO CLIMA

Estratégia Nacional de Bioeconomia

MINISTÉRIO DO DESENVOLVIMENTO, INDÚSTRIA, COMÉRCIO E SERVIÇOS

MINISTÉRIO DE MINAS E ENERGIA

Plano Nacional de Transição Energética

With the support of...

as Platform Secretariat lead

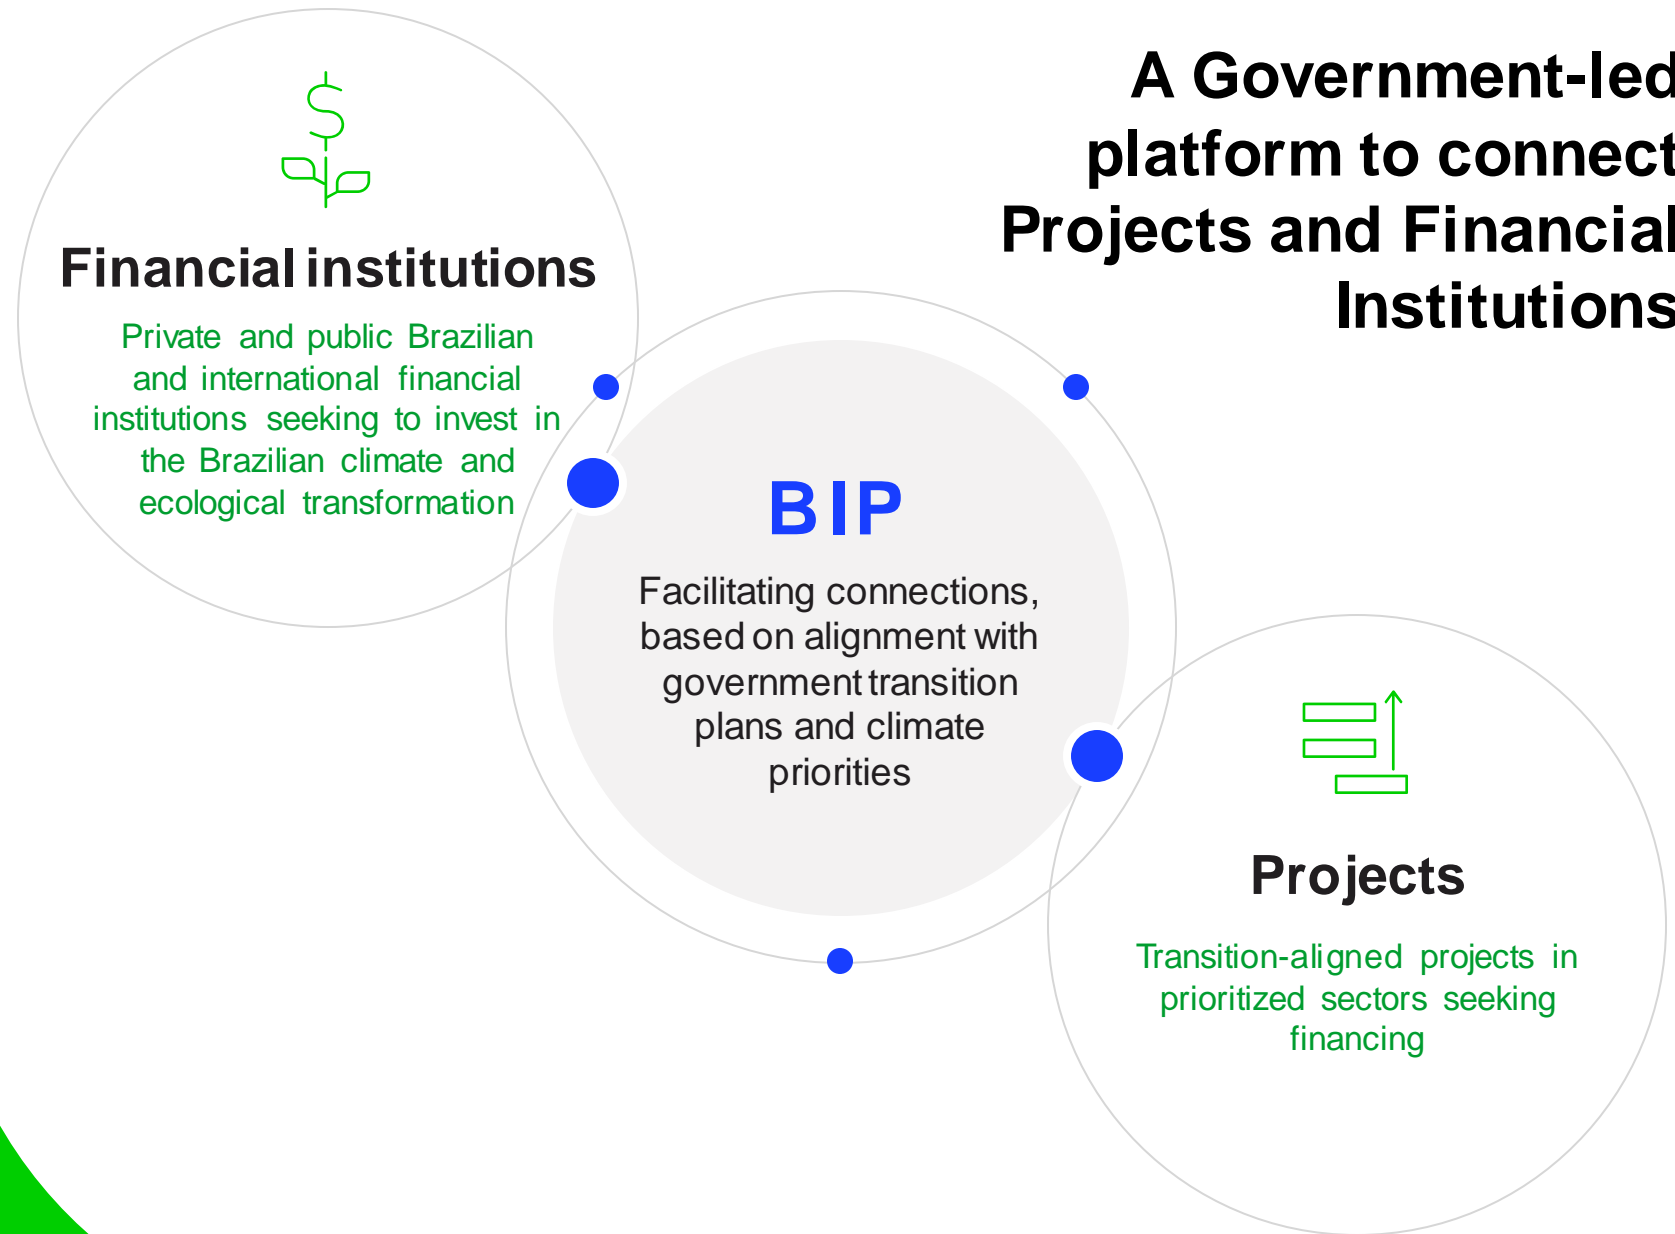

... BIP will further support the efforts of advancing Brazil's NDC, with the government transition plans as strategic guidelines

BIP Ambition

“To support the advancement of Brazil's ambitious climate goals, increasing transition investment from all sources in support of the government's climate transition plans in key sectors.”

A Government-led platform to connect Projects and Financial Institutions

BIP will foster public-private collaboration across relevant stakeholders and initiatives

BIP will focus initially on three main sectors

GUIDED BY

Ecological Transformation Plan

Climate Plan

National Native Vegetation Recovery Plan

Bioeconomy National Strategy

National Solid Waste Plan

New Industry Brazil

National Energy Transition Plan

SECTORS

Nature-based Solutions & Bioeconomy

Industry & Mobility

Energy

SUBSECTORS

Sustainable fuels

Recovery of native vegetation

Electric urban mobility

Resilient renewable systems for isolated areas

Sustainable management of native vegetation

Low carbon emissions hydrogen

Agricultural bio inputs and green fertilizer

Technologies for resilient power grids

Waste management

Low carbon emissions steel / aluminum

Offshore wind

Regenerative agriculture

Low carbon emissions cement

Biotechnology

Energy efficiency

Strategic minerals

BIP has six parameters for project qualification

Minimum parameters

Alignment with transition plans and national programs

Is the project aligned with the government's transition plans and programs that were prioritized by the platform's Steering Committee?

Material environmental impact

Is the end-product expected to generate significant positive environmental impact?
– E.g., CO2e emissions reduction, avoidance, absorption and/or sequestration

Material amount of capital mobilization and support from the platform needed

Is the amount of capital requested superior to X? (capital threshold will be defined for each subsector)
Does the project need support to raise funds with private and/or public financial institutions?

Socio-economic co-benefits

Are there additional socio-economical co-benefits associated with the project?

Other considerations

Promotion of technological development

The project promotes technological development in its sector?

Alignment with credible climate frameworks, including private FIs' net-zero commitments

Is the project aligned with globally accepted climate frameworks, where applicable? (e.g., European taxonomy, American regulation)

Governance

GROUPS

PARTICIPANTS

ROLES

Steering Committee

- Lead and elevate the Platform agenda within the government to advocate for necessary policy changes that unlock financing and enabling environment barriers to scaling investment flows
 - The Ministry of Finance is the coordinating ministry within the government
- Establish the Platform as the main collaborative body for Brazil's net zero transition by integrating existing pathways and programs to mobilize capital at scale
- Decide on inclusion of new government participants (i.e., Ministries, based on programs)

Secretariat

Led by:
BNDES

Platform Secretariat
team

- Set and drive the Platform workplan
- Provide overall administrative and project management support
- Facilitate communication and collaboration among Platform and external stakeholders

Financial Institution Network

+ Working Groups

- Financial Institution Network: Participate in regularly scheduled meetings related to the Platform's pipeline to explore potential investment opportunities
- Working Groups: Promote discussions to address the main barriers to investment in specific subsectors and projects, where a sectoral program does not exist

Partners

- Provide technical and/or organizational support to the Secretariat, General Session and Working Groups, utilizing network and/or capabilities to support the Platform objectives

Supporter Network

Civil society organizations (e.g., associations and federations, NGOs, forums and councils etc.)

- Facilitate connection between the Platform and external stakeholders to support the development of project pipeline and overall objectives and provide input with sector-specific knowledge
- Participate in meetings on Platform progress, workplan and pipeline

Working Groups

There will be opportunities for more in-depth discussions to explore solutions for specific projects and enabling environment barriers

	I – PROJECT MEETING	II - WORKING GROUPS
Description 	One larger group with all participants  <div data-bbox="1327 339 1628 534" style="border: 1px solid black; padding: 5px; display: inline-block;"> Group can be general or per sector, depending on total number of projects </div>	Smaller groups with smaller sub-set of participants 
Led by 	Secretariat	Elected participant, supervised by Secretariat
Participants 	Financial Institution Network, BNDES, Ministries, MDBs, DFIs, sectoral initiatives	Financial Institution Network, BNDES, Ministries, MDBs, DFIs, sectoral initiatives, defined by theme
Envisaged topics of discussion 	<ul style="list-style-type: none"> Pipeline: Present new projects being proposed for pipeline inclusion and the state of the existing pipeline Define topics to be addressed by Working Groups 	<ul style="list-style-type: none"> Project specific matters (E.g., feedback from FIs on potential project structuring) How to address enabling environment barriers (E.g., currency risk, country risk, regulatory uncertainty)

 Details relating to the Working Groups (E.g., objective inclusion criteria, configuration, participants, frequency) still being confirmed

Thank you!

Financial institutions

Should you be interested in learning more of projects in the BIP pipeline, you may reach out to the Secretariat to join the Platform's network

Project owners/developers

If you have a project that aligns with the BIP sectors, please contact the Secretariat to submit your project for consideration

Please contact the Secretariat via bip@bndes.gov.br to submit a project for consideration or to be included in the network of financial institutions
