Objective: Law 12,431/11

In order to promote private long-term financing of investments, in particular infrastructure, the Federal Government enacted Law # 12,431 which provides tax breaks for capital market instruments, creating alternative sources of long-term funding.

The Law provides for zero income tax on interest earned and capital gains for nonresidents and Brazilian individuals. It introduced two types of local currency fixed-income instruments:

- Capex Bond/Funds – when the tax break applies to non-residents only;
- Infrastructure Bond/Funds – when the tax break applies to both residents and non-residents.

A 10 percentage point reduction of the income tax rate applies for financial institutions.

The same tax benefits apply to Private Equity Funds that invest in infrastructure (FIP - IE).

**Brazilian
Infrastructure Bonds
(main features)**

- Minimum duration of 4 years at issuance (6 years in the case of FIDC);
- Fixed rate or inflation-linked;
- There should be no repurchase by issuer during the first 2 years after the issuance date;
- No resale commitment undertaken by the buyer;
- Periodic interest payments (if applicable) of no less than 180 days;
- The instrument must be registered in a regulated securities market authorized by the Central Bank of Brazil or the Brazilian Securities Commission;
- Simplified procedure showing issuer's commitment to allocate raised funds in future payments or reimbursements of expenses, costs or liabilities related to investment projects;
- Dollar-denominated instruments are not eligible for the tax breaks;
- Public Issuance (Securities Commission Instruction 400) or Public Issuance with Restricted Efforts (Securities Commission Instruction 476).
