Abstract

This text presents the calculation and evaluation of the Brazilian tax burden for the year 2005. The concept of tax burden used is wide and includes social contributions, intervention in the economic domain and interest of professional and economic categories, besides taxes, duties and improvement contributions, comprised by the concept of tax pursuant to art. 145 of the Federal Constitution. The calculation of tax burden also includes the contributions for the Employment Security Fund (Fundo de Garantia do Tempo de Serviço - FGTS). As the estimation considers the taxes and contributions related to the three levels of the Government, the result verified constitutes and indicator of the effort of Society to finance the State's activities.

TAX BURDEN IN BRAZIL - 2005

1. INITIAL CONSIDERATIONS

The Brazilian Tax Burden was 37.37% of the GDP in 2005, which corresponds, in the portion related to the Union, an increase of 1.18% in relation to the past year. This result, however, was not derived from any tax or contribution, increase in rate or calculation base related to federal taxes or contributions but, on the other hand, several tax system relaxation measures were adopted (Table 8). Therefore, the result of the portion related to the Union can be attributed mainly to a greater profitability of important economic sectors, specially in the year 2005, with positive reflex on the Income Tax and the Contribution on Net Profit (see chart 01), the ongoing increase in the efficiency of the tax administration, the adoption of legal measures to enable greater efficiency in the control, such as the mandatory withholding tax in payments made to companies rendering services and the recovery of due payments thanks to supervisory and charging work .

Chart 01

Detailing of the Tax Burden (% of GDP)			
	2004	2005	Var. (p.p.)
Total	35.88	37.37	1.49
Union	25.00	26.18	1.18
SRF	17.13	17.96	0.83
IR/CSLL	7.31	8.08	0.76
PIS/Cofins	5.49	5.59	0.10
Other SRF	4.32	4.30	(0.03)
Social Security	5.31	5.60	0.29
Other	2.56	2.62	0.06
States/Municipalities	10.88	11.20	0.32

2. PERFORMANCE OF THE ECONOMY IN 2005

The GDP (at market prices), accumulated in the four quarters of 2005, presented actual growth of **2.3%** in relation to the previous year, a consequence of the positive performance of the Industry (+2.5%), Services (+2.0%) and Agriculture and Cattle Raising (+0.8%). The actual growth of the GDP *per capita* in 2005 reached 0.8% in 2005 compared to 3.40% in 2004.

The industry was the main highlight of the analysis of the **growth of the economy**. The industrial GDP grew 2.5%. The industrial sector related to mineral extraction was the one to present the best performance (+ 10.9%, compared to - 0.70% in 2004), with the outstanding performance to oil extraction activity. The agriculture and cattle-raising sector grew 0.8%, despite harvest losses and foot and mouth disease. The services sector, in its turn, grew 2.0%, with highlight to the slowdown of the commerce sub-sector, whose growth in 2004 was 7.9% and 3.3% in 2005.

CHART 02
GDP Growth Rates 2005

Sector	Partic. in GDP Growth Rate 2005	
Farming and cattle raising	8.4%	+ 0.8%
Industry	40.0%	+ 2.5%
Services	57.0%	+ 2.0 %
Total:		+ 2.3%

Source: IBGE.

In actual terms, the raise of 5.3% in salary mass contributed to the raise of 3.1% in the consumption of the families. The expansion of salary mass is compatible with the reduction of the average unemployment rate, which decreased from 11.5% in 2004, to 9.8%, in 2005. The behavior of salary mass is relevant from the tax point of view because it reflects directly at least on two tax assessment bases: income and consumption.

Externally, exports and imports of goods and services presented a growth of 11.6% and 9.5%, respectively, in 2005. The commercial surplus reached US\$ 44.76 billion and the commerce flow reached US\$ 191.85 billion. Although there is practically no taxation on export, the behavior of the sector has important reflections on several internal sectors of the economy, generating impacts on the collection of income tax and contributions to the INSS. The imports reflect directly on the taxation of consumption. The inflation indexes indicated reduction on the variation of prices in 2005 compared to 2004. The Extended Consumer Price Index (IPCA), which guides the monetary policy of the Brazilian Central Bank and takes into account families with income between 1 and 40 minimum wages, reached 5.69% (7.60% in 2004). The General Price Index – Domestic Supply (IGP-DI) calculated by the Getulio Vargas Foundation (FGV) reached the lowest value since the beginning of the calculation of the series, in 1944: 1.22% in 2005 (12.13% in 2004).

3. TAX COLLECTION

The aggregated collection of taxes and contributions in Brazil in 2005 was **R\$ 724.11 billion**, representing face increase of R\$ 90.3 billion (+14.25%) compared to the previous year. Using the implicit GDP deflator (7.21%), it is possible to observe an actual increase of tax revenues of 6.56% (R\$ 44.59 billion). This result was obtained specially by economic growth, higher profitability of companies and improvement of efficiency in Tax Administration.

The actual growth of incomes, in absolute terms, was basically concentrated on Corporate Income Tax (IRPJ), the CSLL, the social security contribution and the ICMS. Taken into account as a whole, these taxes represented about 60% of actual increase in tax collection. The Cofins also presented an increase.

Along the year 2005, tax law remained relatively stable, without any raise in rates or increase in the calculation basis.

The IRPJ and the CSLL are applicable on the positive result of companies. Bearing the divulged balance sheets in mind, we can affirm that the good result of these two taxes (+ R\$ 12.96 billion) reflects a raise in profitability in a great portion of companies in 2005. Sectors such as fuels, electricity, basic metallurgy and finance contributed to raise the taxable base and, therefore, the due tax.

The actual increase of R\$ 7.91 billion in the collection of contributions for the INSS is explained by the collection from Public Authority bodies, the retention of 11% over services invoices and granted installments, with the effort made by credit recovery actions. It is also important to highlight the collection from companies in general, which reflected the expansion of salary mass.

The collection of ICMS contributed with R\$ 6.56 billion, in real terms, in the absolute raise in tax collection.

It is also worth emphasizing the real raise of R\$3.60 billion in the Cofins. Differently from the other raises, the evolution in the collection of Cofins is the result of the combination of two factors. First, the taxation of Cofins over imports in 2004 only occurred from April on, against the taxation in the whole year of 2005, that is, the basis for comparison is reduced. Second, there was also the approval of compensations made from financial institutions, with appropriation in the gross collection of Cofins and effect only in the gross collection.

4. EXPLANATORY NOTES AND SOURCE OF DATA

1. The tax incomes administrated by the SRF do not include the amounts referring to legal additions (fines, interest and monetary correction) and, therefore, they differ from amounts monthly divulged by this Secretariat.
2. The amounts of the Income Tax withheld at source (IRRF) by States, taxable on the income paid by them, their foundations and autarchies, were obtained with the Secretariat of the National Treasury.
3. The amounts of the contributions for the state and municipal social security until 2003 were obtained from the IBGE (System of National Accounts). For the years 2004 and 2005, these amounts were estimated.
4. State taxes had the Confaz as a source.
5. The total municipal tax collection was obtained with the STN.
6. When calculating the income flow between the government levels, the resources intended for the Funds (FNE, FNO and FCO) are regarded as tranferences to States. Data related to the amounts transferred to regional funds were collected from the Ministry for National Integration, through the respective Deliberative Councils. Data from other constitutional transferences were obtained with the STN.
7. Collections of the INSS and "S" System: Social Security Report, monthly published by that Body.
8. Collection of the FGTS: Caixa Econômica Federal.
9. Collection of Education Allowance: FNDE.
10. From 2004 on, the Contribution for Social Security for the Civil Servant started to be administered by the MPOG, and the same change was made in the previous years for comparison purposes.
11. From 2004 on, the principal of the active debt was incorporated to the collection of the respective taxes, and the same change was made in the previous years for comparison purposes.

5. Acronyms and Abbreviations Used

Acronym	Meaning
CIDE	Contribution on Intervention in the Economic Domain
COFINS	Tax for Social Security Financing
CTB	Gross Tax Burden
CPMF	Provisional Contribution on Financial Transactions
CSLL	Social Contribution on Net Profit
DPC	Directorate of Ports and Coasts of the Ministry of Defence
FCO	Mid-West Constitutional Financing Fund
FGTS	Worker's Retirement Fund
FNDE	National Education Development Fund
FNE	Northeast Constitutional Financing Fund
FNO	North Constitutional Financing Fund
FPE	State Participation Fund
FPM	Municipal Participation Fund
FUNDAF	Special Fund for Development and Improvement of Auditing Activities
FUNDEF	Fund for Prim. Education Dev. and Maintenance and Enhancement of Teaching Profession
IBGE	Brazilian Institute of Geography and Statistics
ICMS	Value Added Tax on Sales and Services
INCRA	National Institute of Colonization and Land Reform
IPI	Tax on Industrialized Products
IPTU	Tax on Urban Property
IPVA	Tax on Property of Vehicles
ITBI	Tax on Real State Conveyance
ITCD	Inheritance and DonationsTax
ISS	Tax on Services
MPOG	Ministry of Planing, Budget and Management
PAES	Special Installment
PASEP	Civil Servants Saving Program
PIB	Gross Domestic Product
REFIS	Tax Recovery Program
SEBRAE	Brazilian Micro and Small Businesses Supporting Service
SENAC	National Commerce Training Service
SENAI	National Industrial Training Service
SENAR	National Rural Training Service
SENAT	National Transportation Training Service
SESC	Social Service for Commerce
SESI	Social Service for Industry
SEST	Social Service for Transport
SRF	Secretariat of the Federal Revenue
STN	Secretariat of the Nacional Treasury
